

FIREWALL MIGRATION

Advanced Professional Services

KEY BENEFITS

Our Firewall migration service provides the following benefits:

- Migration by experienced and trained engineers
- No need to depend on in-house security expertise
- Cost savings of 30~50%
- Remote support from our expert engineers

AT A GLANCE

Firewall technology longevity typically spans from between 5-7 years and upgrades are often initiated by growing organizations and changing security requirements. A firewall is an item of critical network security infrastructure and any change in technology is fraught with risks to business continuity.

Our professional services team can assist organizations from applying a standard methodology to executing a firewall migration. Each migration project deployed is unique and represents a different set of challenges. The key to our success is to treat each case with the same level of care and professionalism.

ADVANCED PROFESSIONAL SERVICES

Our team supports all the leading firewall vendors with firewall management, optimization and support services. Our team benefits from in depth expertise relating to the complete range of network security appliances and we work collaboratively with our technology partners to optimize processes and toolsets for the implementation of Firewall Migration services.

OUR CERTIFIED ENGINEERS:

- Cisco
- Cisco Sourcefire
- Checkpoint
- Palo Alto
- Juniper
- Fortigate

Technology Partners:

CASE STUDY: MAJOR UK BUILDING SOCIETY, 2014

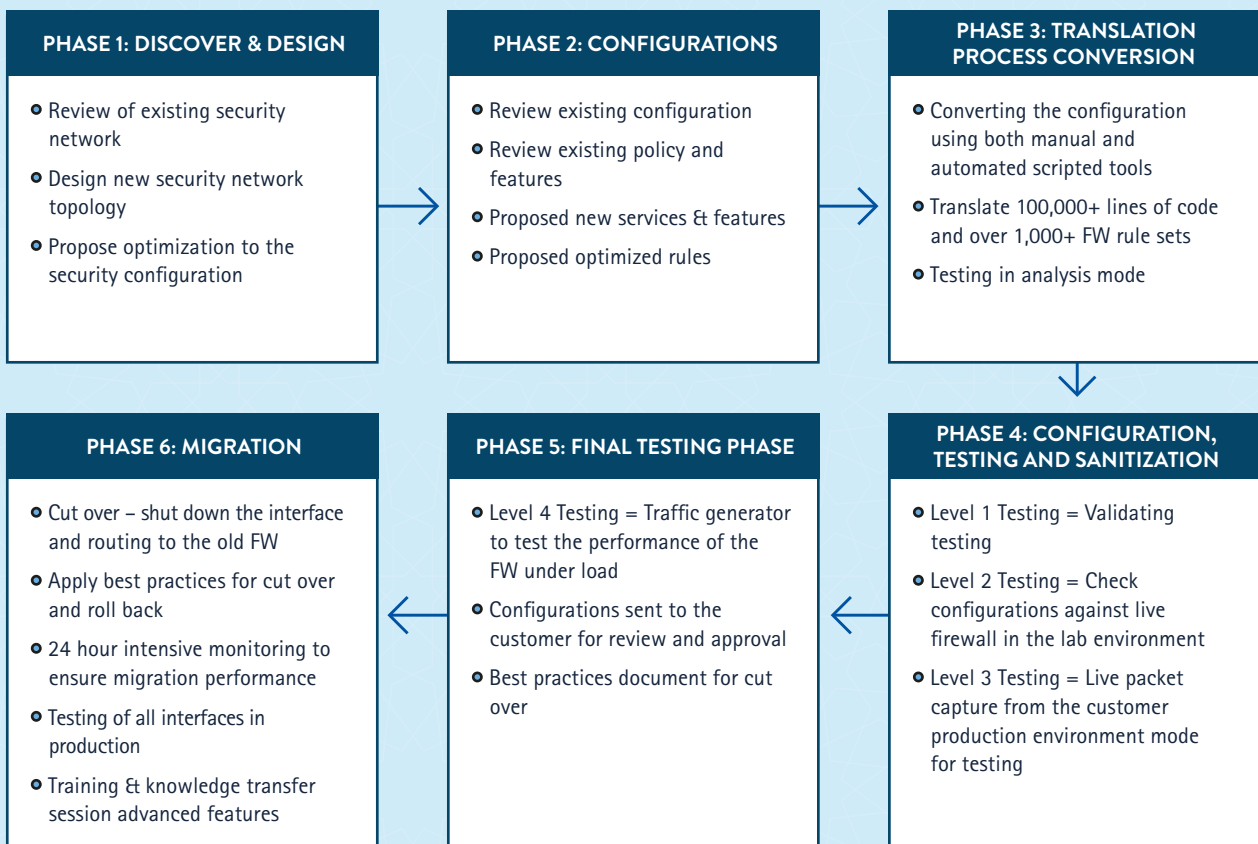

END CLIENT: MAJOR UK BUILDING SOCIETY

DATE: 2014/15

OUR CLIENT: BT

BT were engaged to support a major UK Building Society for the successful migration of 12 pairs of mission critical Data Centre firewalls from McAfee Sidewinders to Cisco 5585x firewalls. Our team was engaged to perform the professional services required to perform this complex operation.

The scope included handling all the professional services from design, configuration, planning and migration works and included the translation of over 100,000 + lines of code and over 1,000+ FW rule sets. The project was completed in under 6 months.

OTHER COMPLEMENTARY SERVICES

- Cisco ISE Design and Implementation
- 24x7 Firewall Security Monitoring (SIEM)
- 24x7 Firewall Management & Next Generation Management
- SIEM as a Service
- Assisted SOC Services – Powered by LogRhythm
- Security Testing Services – VAPT and Web App Testing
- Security Road Mapping & Compliance
- Network Risk Assessment
